Strongest: JavaScript, HTML5/CSS3/SCSS, jQuery, Git/CVS/SVN, Adobe Photoshop & Animate, NodeJS/Express
Experienced: PHP, NPM, AngularJS, GruntJS, Heroku, Apache, Mocha/Chai, MongoDB, Firebase, MySQL

PROFESSIONAL EXPERIENCE

Independent Contractor *(clients include: Robert Half, Doremus, EBay, Bleu Marketing, RAPP, etc.)*   June 2015 - present
Front-End Developer
Web Development using a wide-variety of tech, that typically will include...

- ❖ Responsive and browser-friendly HTML5 Development
- ❖ Expert Sass/CSS stylesheets
- ❖ PHP backend or other JS Frameworks
- ❖ Adobe Animator, CSS anims, or JQuery anims
- ❖ Responsive email creation and Litmus testing
- ❖ Modern JavaScript and/or jQuery coding
- ❖ Handlebars or C# based HTML5 templating

Horoscope.com, Inc.   2003 - 2014
Front-End Developer
Developed and maintained numerous high-traffic astrology websites.

- ❖ Developed and maintained the front-end of various company & partnered websites (ex. MSN Astrology, Astrocenter.com, etc), using my excellent HTML5/CSS3, and JavaScript skills
- ❖ Expertly resolved CSS3 selector specificity conflicts using Chrome Dev Tools and Firefox FireBug
- ❖ Created pixel perfect sites (from Photoshop PSD mockups) that were cross-browser compatible
- ❖ Designed UI/UX user interfaces from scratch, as necessary
- ❖ Optimized pages based on load time, SEO performance, and user click/bounce rates

iOS Software Developer
Developed and maintained several popular and highly-rated Astrology apps for the Apple App Store.

- ❖ Developed various astrology related iOS apps (5 iPhone/1 iPad) in Objective-C.

Independent Contractor   2001 - 2002

- ❖ Localization Software Engineer for several children's entertainment projects.

The Learning Company / Mattel Interactive   1996 - 2001
Localization Software Engineer
Localized children's educational software titles like Arthur, Reader Rabbit, Pokémon, & Elmo/Sesame Street.

- ❖ Localized s/w titles into the "big-5" languages (UK, Fr, Ge, Sp, Du) using C++ and/or in-house script languages
- ❖ Interviewed/Mentored new Localization Engineers and QA Engineers

SOFTWARE ENGINEERING - SAMPLE PROJECTS

Full-stack Web Developer | Long Overdue --> www.longoverdue4hair.com
A local SF hair salon website, that targets Desktop, Tablet, and Mobile devices

- ❖ Designed the layout and UI, and hand-coded in HTML5/Sass/CSS3, using a full window "Hero" landing page design
- ❖ Used JavaScript/jQuery/AJAX front-end, over a NodeJS / GruntJS backend
- ❖ Created a custom (AJAX/JSON based) photo gallery, and CSS/jQuery page animations

Full-stack Web Developer | Road-Trip Advisor --> roadtrip-advisor.heroku.com
A web app that makes road trips more fun by combining high-quality Google Maps with the best reviewed nearby activities on Yelp.

- ❖ Helped create, research and develop this popular travel app
- ❖ Developed a Google Map API routes algorithm and a Yelp filtering algorithm
- ❖ Created a responsive Bootstrap app front-end with a separate landing page

EDUCATION

Makersquare - *Advanced JavaScript Development* - **June 2015 | San Francisco State Univ.** - BS Bus./Info. Sys. - **June 1994**
